- Work Documentation

EXPERIENCE

Service Technician II
Coca-Cola Bottling Company United, 2016 - 2023

- Document and maintain accurate reporting on equipment in accounts serviced to provide detailed work history

- Provide phone fix service for customers to address and resolve technical problems as soon as possible

- Survey for and assist with the installation of new Coca-Cola systems in customer outlets

- Operate and maintain company-owned vehicle

- Maintain an accurate inventory of parts and equipment

- Work independently with no direct supervision, managing time and resources

- Develop and maintain strong relationships with customers to ensure satisfaction and continued business relationship

- Provide on-the-job training and mentorship to new Service Technicians to ensure a smooth transition and successful integration into the team

Structural Journeyman
U.S. Air Force, 2009 - 2015

- Conducted detailed surveys of proposed work sites, utilizing analytical skills to determine precise material and labor requirements.

- Prepared comprehensive cost estimates, showcasing a keen understanding of project financials and budgeting.

- Managed, inspected, and evaluated work center activities, ensuring analytical oversight for quality control and efficiency.
- Interpreted and generated intricate working drawings and schematics, crucial for the maintenance, alteration, and repair of complex building structures.
- Upheld compliance with commercial and military publications, showcasing a commitment to industry standards through analytical adherence.
- Submitted and reviewed requisitions for necessary supplies and equipment, employing analytical skills to ensure seamless project execution.
- Discussed inspection findings with precision and recommended corrective actions based on thorough analytical analysis.
- Exercised discernment in the selection of construction materials, considering technical factors.

EDUCATION

Certification: Full Stack Web Development (MERN Concentration)
University of Central Florida, Orlando, FL, Aug 2023

- 24 Week, 240 contact hour intensive program focused on gaining technical programming skills in MERN stack.
- Acquired proficiency in front-end technologies including HTML, CSS, and JavaScript to create dynamic and responsive user interfaces.
- Developed strong skills in back-end technologies such as Node.js and Express.js for server-side scripting and routing.
- Gained expertise in database management with SQL and MongoDB, enabling efficient data storage and retrieval.
- Extensive hands-on experience in building full-stack applications, integrating the MERN stack components seamlessly.
- Mastered the principles of React.js for building interactive and user-friendly single-page applications.
- Applied knowledge of RESTful API design, ensuring effective communication between the front-end and back-end systems.
- Successfully completed projects that showcase a comprehensive understanding of the MERN stack and its applications in web development.
- Collaborated in team-based projects, enhancing communication and teamwork skills in a professional development environment.
- Demonstrated problem-solving abilities through the successful implementation of various features and functionalities in web applications.
